

Molly M. Quinn, MD

Molly M. Quinn, MD, is a board certified reproductive endocrinologist, affiliated with the Keck School of Medicine of the University of Southern California. She received her medical degree from David Geffen School of Medicine at UCLA and did her specialty and

subspecialty training at University of California San Francisco (UCSF). A member of the Alpha Omega Alpha (AOA) Honor Society, as a resident, Dr. Quinn was the recipient of the North American Menopause Society's Pfizer Medical Resident Reporter Award and

the UCSF CTSI Resident Research Funding Award.

Her research interests include optimizing pregnancy outcomes subsequent to assisted reproduction, the role of the reproductive laboratory in improving in vitro fertilization (IVF) outcomes, and the long-term safety of IVF and related treatments. In addition, her areas of clinical focus include clinical and biochemical features of PCOS, fertility preservation in oncology patients, and assisted reproduction for HIV serodiscordant couples.
